

Model No.	A Length	B Width	C Height approx	Internal length	Internal width
1700	1660	750	860-1260	1350	505
2000	2016	750	860-1260	1680	505

Approximate dimensions. All dimensions expressed in millimetres

Maximum Load : 130kg/21st

Please note: Kingkraft engineers can advise on all aspects of fitting the bath and provide a commissioning service following installation by others to ensure the bath is in a fully working and safe condition. It is imperative that correct advice is sought from Kingkraft regarding a suitable water supply system in your home prior to ordering. The bath is not intended for use with low flow rates as this will lead to slow filling.

Kingkraft Customer Care

The following services are offered to make the process of choosing your Kingkraft product as straight forward as possible. Kingkraft Care continues following delivery to ensure the products continue to provide the maximum benefit.

- Product demonstration and assessments
- Bathroom layout design and drawing
- Technical support both prior to order and following delivery
- Product commissioning
- 12 month product warranty (extended warranties available)
- On-going product servicing and preventative maintenance schemes

For full details of these services please contact our customer service department or refer to our product information folder.

Luxury bathing

Beautifully designed and manufactured in the UK by Sheffield craftsmen, the Lifestyle bath from Kingkraft will complement the most elegant of bathrooms.

Imagine regaining the pleasure of a long, deep, relaxing soak

The bath is attractively styled but does not compromise on allowing ease of access for those who struggle to cope with a conventional bath. Imagine regaining the pleasure of a long, deep relaxing soak. Add to the relaxation with the addition of the optional Kingkraft whirlpool system.

How does it work?

The bath can be set at a convenient fixed height to suit the needs of the user. There is a fully opening side panel which operates at the touch of a button. The bather approaches the bath with the side open and sits on the bath tub base to ease themselves into position. Optional grab handles can be positioned by the user where required. The push button is then operated to close the door. Conveniently positioned taps are operated to fill the bath with water at a preset comfortable temperature. Following bathing the waste control is operated remotely by the bather and the procedure operates in reverse to allow egress. Simple, convenient and effective.

additional options

- Variable height option
- Removable grab handles- secured by suction cups just where you need them
- Whirlpool system
- Independent wall mounted mixer valves for variable temperature control
- Integral shower
- Twin wastes for rapid evacuation of the water following bathing.
- Choice of colours – (approximate matches of colour only)
